## Northern lights

Iceland is one of the world's most accessible spots for viewing the northern lights, The best season to see the northern lights in Iceland is from September to mid-April.

The northern lights are the result of electrically charged particles from the sun colliding with gaseous particles in the Earth's atmosphere, causing displays of bright, colourful dancing lights. They are visible in the magnetic polar regions of the northern and southern hemispheres they can range in colour from white, green, pink and purple.
