## THE MALTESE ISLANDS

Strategically located at the centre of the Mediterranean, for centuries the Maltese Islands have been at the crossroads of civilization and maritime routes. Malta's location has made it coveted territory for many nations, and has been conquered and protected by every expansionist power that ever shaped history in this cradle of civilization, from the Phoenicians, Carthaginians, Romans and Arabs to the Normans, the Knights of St John the French and even the British.

7000 years of history and hospitality have contributed to making Malta a truly unique destination. The Islands' colourful past is reflected in its rich architectural landscape, from prehistoric temples, exquisite palaces and impressive fortifications to Medieval towns and Baroque cities, which set an exclusive backdrop to any event.

Malta however has not stuck in the past, and also offers contemporary and state of the art facilities. Continuing public and private investment in infrastructure and in the service industry ensures that Malta continues to attract more business tourism and to follow its long-standing and quality tradition of welcoming and hosting corporate tourism from around the globe.

**DAY 3**

## BATTLE OF THE SEAS

This action-packed day challenges teamwork and creativity, with a strong element of competition. The guests are going to be divided into 2 teams, pirates and knights, and transferred by speedboat to twin-mast gullets. Once guests board their gullets, they will be greeted by the crew and will respectively be given pirate or knight props and costumes. Before setting sail, the teams will be debriefed by the captain.

The gullets will start cruising to the battle location, and on their way, the teams have various tasks to carry out. Points gained from these tasks will act as money to purchase ammunition and targets for the battle, such as water pistols, water cannons, buckets and equipment to build targets for their boat. The targets will be created by team members with hula hoops, sheets of paper and masking tape. The targets will have to be positioned in visible places around the gullet.

The Knights and Pirates must listen out for the horn to signal the start of the battle.

The teams must use their cannons and water guns to destroy the opposing team's targets and thus 'sink' their vessel.

Once the battle is won, the gullets will sail to a beautiful bay where the guests will relax and enjoy a spot of swimming before a lavish buffet lunch is served on board the gullets. At some point in the afternoon, the gullets will cruise back to the starting point.

(N.B. This activity is dependent on weather conditions)
